bindtechs

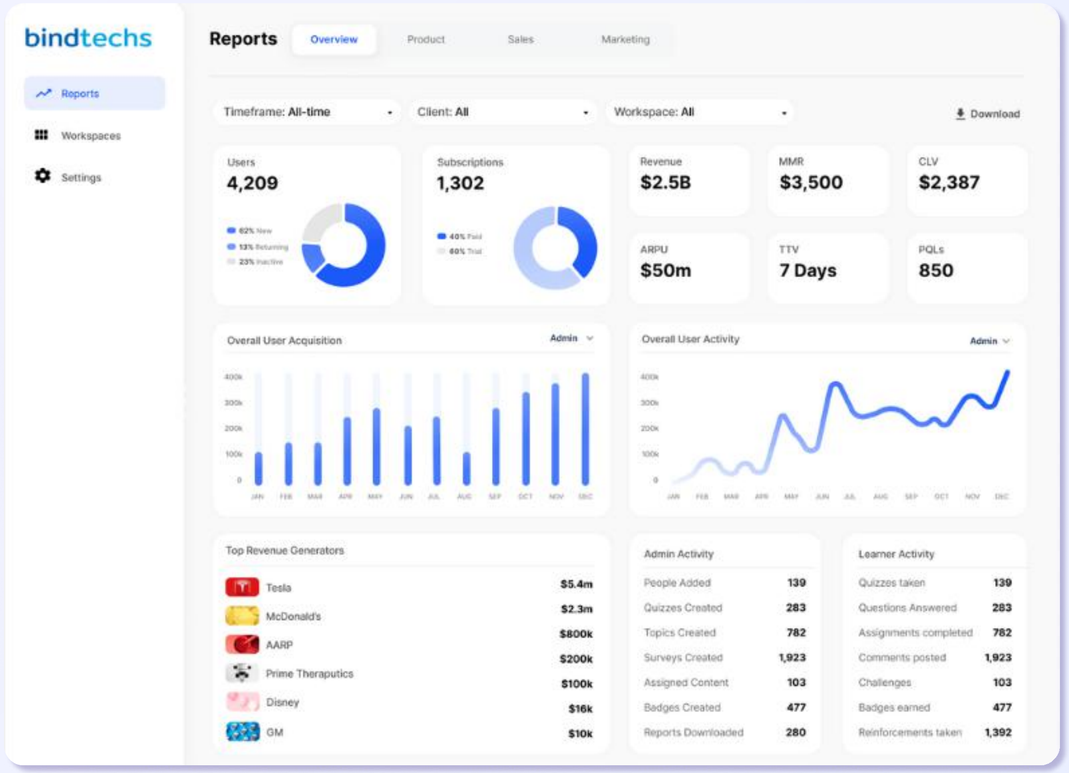
Big Data I No Code

(C) Bind Technologies, SolidOne Software OÜ, 2022

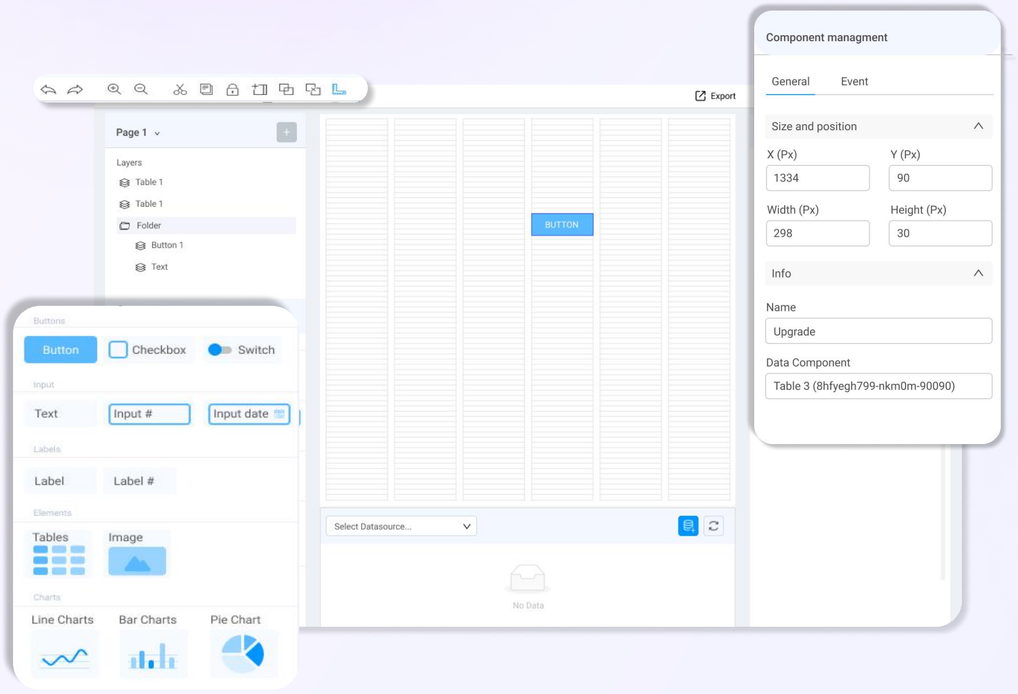
About BindTechs

BINDTECHS is a cutting-edge technology startup offering code-free cloud software for different businesses

Our flexible and scalable solution enables seamless collaboration and enhanced digital visualization for local and global operations. No-code cloud software for collaborative work in production drives faster automation. Custom solutions are built with ease for your individual needs



How automation can benefit operation?



Industrial automation saves time and money from its conception and into the future

- Production processes are digitalized for optimization, making it possible to visually see problems in factories and production plants.
- No matter the complexity of the project, a no-code system allows you to master and use BindTechs technology within a few days of implamentation.
- Our task is to help you set up more automated systems in a very short time, and without the use of programming or scripting. BindTechs is compatible with most PLC and RTU models, and supports variousconnection protocols.

What are the benefits of automation?

Automating and data binding is the new key to enabling factories to increase productivity

- Lower operating costs
- Improved worker safety
- Reduced factory lead times
- Faster ROI
- Ability to be more competitive
- Increased production output
- Consistent and improved part production and quality
- Smaller environmental footprint

What Bindtechs is capable of

- Data mapping & enginering
- Corporate data management
- Data analytics to drive digital strategy
- Data performance dashboards
- IT support & security
- Business intelligence & dashboard reporting
- Machine learning software
- API development services
- API integrations
- No-code solutions

Powerful Solutions to Accelerate Your Performance

MANUFACTURE DASHBOARD

This is a powerful tool that can help improve operations and increase efficiency. With a Manufacture Dashboard, you can easily access and view key performance indicators (KPIs) and other important data in real-time, allowing you to make informed decisions quickly.

Furthermore, the dashboard can help to track the inventory, production process, and machine utilization, which can lead to reduction in downtime and increase in the overall production.

Powerful Solutions to Accelerate Your Performance

BUSINESS HEALTH DASHBOARD

Dashboard is equipped with enormous designs for the modern CEO. This powerful tool summarizes complex data points into easily digestible snippets that can be translated into clear actions for your CXO.

With the help of supply chain dashboard the logistic and warehouse operations can track their supply chain in real-time inventory levels in a single display.

Powerful Solutions to Accelerate Your Performance

SALES & MARKETING DASHBOARD

With a Sales & marketing Dashboard, you can track sales data, identify popular products and services, and adjust marketing strategies to increase sales.

You can track customer demographics, feedback, and preferences, allowing the business to tailor services to meet the needs of customers better

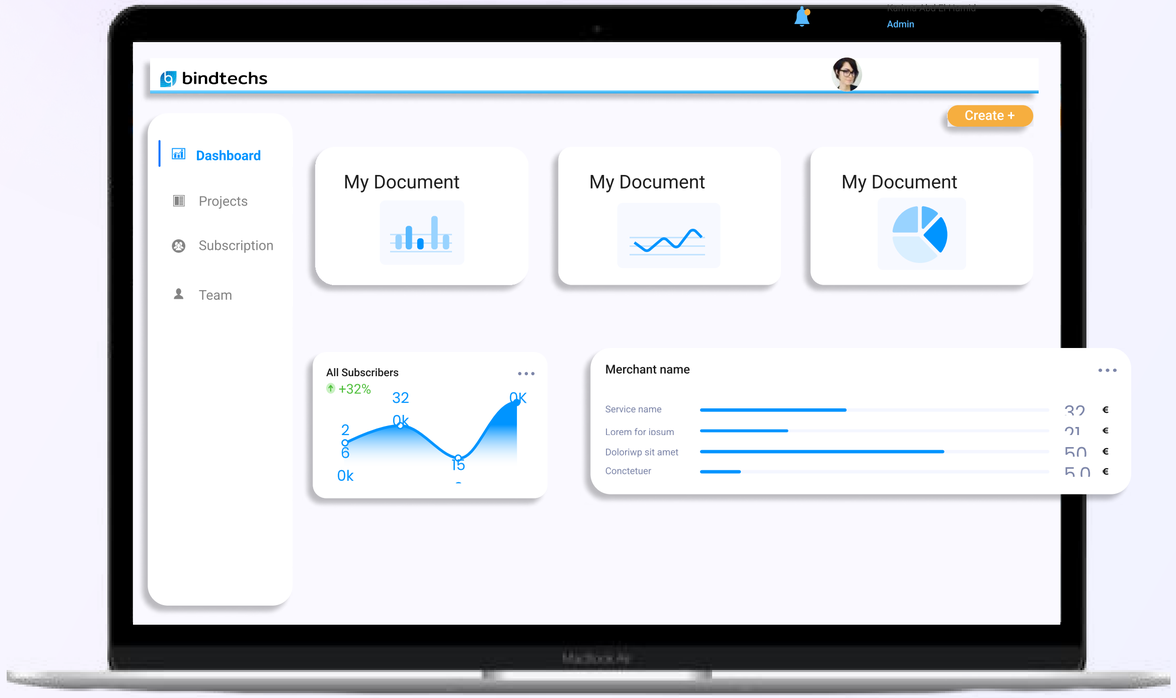
Powerful Solutions to Accelerate Your Performance

INVESTMENT MANAGEMENT DASHBOARD

This is a type of dashboard which summarizes information and simplifies complex data set into an easy intelligible view to the decision-makers.

It can also provide valuable insights into operations, such as identifying bottlenecks or inefficiencies, which can help you make more informed decisions about where to invest in new technology or resources.

This is a **Flexible Builder** with a full set of tools for Supervisory Control And Data Acquisition

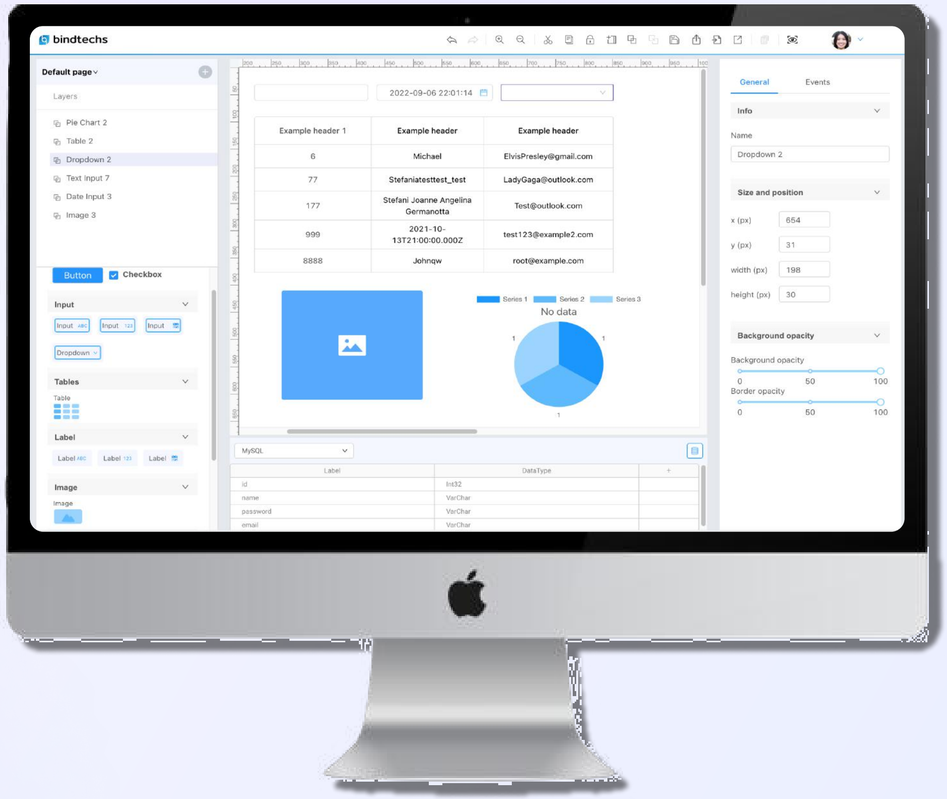


Web-based solution built on next-gen technologies

Real-time connection between any databases and IoT devices

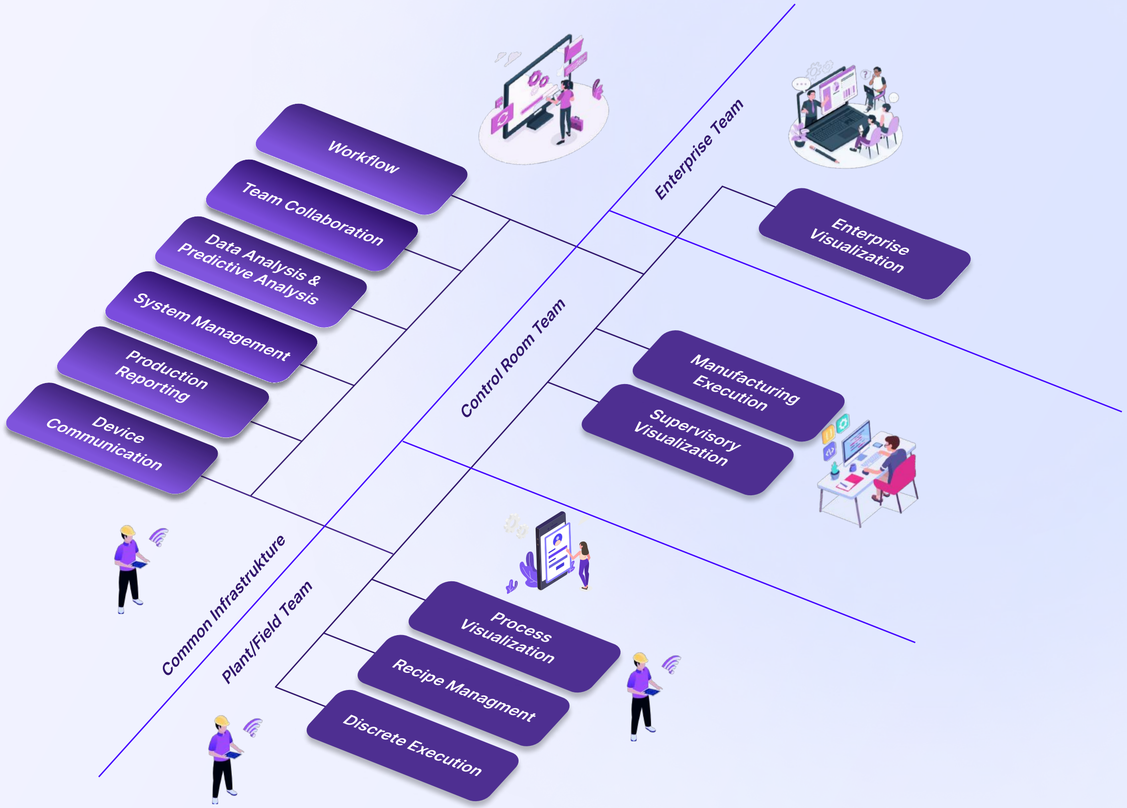
Simultaneous visulization of all data from any number of devices

Build tables, charts, and graphs from any data source



About Operations Control

BindTechs Operations Control is a comprehensive and scalable solution that enables HMI and supervisory visualization, seamless collaboration, manufacturing execution, and analytics capabilities thatare provided from a combined subscription model.



More about Operations Control

Simplicity

Easy to choose offers that reduce purchase and adoption complexity

Outcome focused

Transform with unparalled insights to digitalize work processes and knowledge

Unlimited

No limitations on IO, tags, or devices–expand information access to more users

Comprehensive

Capability that goes beyond core HMI/SCADA to drive operations excellence

Benefits gained from using our Operations Control

Improve operational effectiveness

Create leaner systems that work towards the elimination of waste, downtime, motion, and waiting time. Reduce non-value added data handling

Increase asset reliability

Reducing the maintenance required for assets increases profitability and lowers the risk of asset failure

Emprower connected workers

Empower stakeholders to reast effictively to different scenarios and allow them to identify opportunities for improvement

What is our competitive advantage?

BindTechs		Regular Scada System
Hierarchical live diagrams to create one picture summaries	⟷	Unintelligent feedback between top level and C-Level management
Dynamic plug & play components with low-code customizable themes	⟷	Dull set of predefined components
Dynamic plug & play modules for everything: SQL, NoSQL, API-based, and realtime (MQTT, Sockets, & event brokers)	⟷	Strict Set of Protocols
Wrap it up and Go	⟷	Complicated UX
